

Broadview Fire Department

Photography

Lieutenant Jonathan Hoadley

2010 Annual Report

Photographic documentation of every aspect of the fire service is critical.

Photographic documentation of every aspect of the fire service is critical. Photos are used to document everything from hydrant maintenance throughout the village to every fire or major disaster incident throughout the state and beyond. The photographers are actively involved in everything from public relations events to fire investigations.

The Broadview Fire Department provides photographers for events within the village and for incidents throughout M.A.B.A.S. division 20. Department photographers document equipment maintenance, buildings within the village for preplanning and they are an asset to training personnel by developing photographic training tools and documenting proper use of tools and equipment.
